MONOGRAM

This version of the logo is only available for use in small spaces, such as favicons or avatars.

Logotype

1.1

ALLOWED SIGNATURES

To allow for smoother and more flexible adaptation according to space, we have established several options and have not defined a single primary version. This versatility ensures that the logo maintains its impact and clarity in various contexts and formats.

Logotype

1.1 CONSTRUCTION GRID

The grid provides a fundamental structure that ensures accuracy and balance in design, guiding the placement and size of elements to maintain visual harmony and coherence.

To preserve the complete legibility of the symbol, the brand must define a protective area around it (based on the "L" letter). This space should not be occupied by other elements, such as texts, images, or other marks, to avoid interference.

1.1 Logotype

REDUCTIONS

To maintain the legibility of our brand, the maximum allowed reduction for graphic application, and digital platforms are shown.

Colors

1.1 Colors

PALETTE

Color reflects our brand's personality. It not only strengthens brand recognition but also maintains visual consistency in every interaction with our audience. Always prioritize HEX colors.

1.1 Typography

PRIMARY

The primary typeface defines the core visual identity of our content. It is used consistently across headlines, subheadings, and body text to create a cohesive and recognizable look. This font enhances readability while reinforcing our brand's tone and style, providing an engaging user experience across all platforms. As a Google Font, it ensures fast access, optimized performance, seamless integration, and broad compatibility across all platforms.

3.2 Typography

WEB SAFE

The web-safe font serves as a fallback option when the primary typeface is unavailable. It ensures consistent readability and presentation across various devices and browsers. This fallback guarantees that our content remains clear and accessible, even in environments where custom fonts may not load properly.

Meerkat

1.1 Meerkat

THE MAIN CHARACTER

The Meerkat is the character with which users worldwide identify. Its distinctive design symbolizes connection and innovation, making it a key part of the AISALON experience.

1.1 Meerkat

CUT OFF

We've established some cutting parameters and ideas for integrating the Meerkat with the different and variable back shapes. The Meerkat's hands should always remain outward to suggest a more natural and integrated appearance.

Elements

1.1 Elements

SHAPES

These are free-form, abstract polyhedrons. Their polygonal shape aligns with the visual style of the Meerkats and serves as containers for city images.

1.1 Elements

GLOBAL SHAPES

The GLOBAL shapes are filled exclusively with the brand's institutional colors and their shades, as they are not associated with any specific city.

1.1 Elements

CHAPTER SHAPES

The CHAPTERS shapes take colors from the city's illustration, but one face of the polyhedron **must always** feature the brand's gradient to maintain visual consistency.

1.1 Elements

CITY LINES

City Lines are connecting lines that interact with the SHAPES, showcasing cities near the corresponding Chapter. They connect through the vertices or edges of the SHAPES, creating a visual link between locations.

EVENT COMBO

The event date combos are designed to adapt to different layouts, ranging from a super vertical option to a fully horizontal one. This flexibility ensures that the dates can be displayed clearly and effectively in any format.
