

VISUAL PLATFORM GUIDE

Your Chapter, On The **AI Salon** Platform.

A non-technical, screen-by-screen tour of every page, tab, and mockup your chapter team will use to plan events, welcome members, and grow the community.

For: Chapter Organizers & Co-Hosts

By: AI Salon · MassaPro Platform Team

Scope: Public site + Admin panel

[FEATURES](#)[MOCKUPS](#)[EMAIL](#)

About this guide

Welcome to the AI Salon platform. This guide is written for the people who run a local chapter — the organizer, the co-hosts, and the volunteers who help produce each salon evening. It walks you through every screen you will touch, in plain language, with the real mockups you will see inside the platform.

You do not need any technical background. There is no code in this document, no API references, no database schemas. Everything you would normally need a developer to explain is shown here as a screenshot, a card, or a short paragraph. If you can use a phone, you can use this platform.

The platform has two halves: a **public site** where members register for events, browse the community, and leave testimonials; and an **admin panel** where your team manages events, members, emails, and the visual mockups you publish on social media. This guide covers both halves in order, ending with the email system and the testimonials moderation workflow.

A quick note on brand colors: throughout the platform you will see four signature tones — **purple** **pink** **teal** **cyan**. These are the AI Salon brand colors. They appear on every page, every mockup, and every email, and they are what make our chapters visually consistent around the world.

How to read this guide: Each chapter covers one screen or one tab. The cards below the chapter title list the features you will use most. Mockup images are real production screenshots, not illustrations.

What you will find inside

- 03 Login page — Google, Sign in, Sign up
- 04 Admin tabs overview — all 15 tabs at a glance
- 05 Members, Speakers, Registrants
- 06 Events tab + the community event mockup
- 07 Chapters, Door Check-in, Dashboards, Reports
- 08 Mockups studio — the four canonical templates
- 09 Meet the Speaker — two designs side by side
- 10 Email system — campaigns, flows, audiences, templates
- 11 Images, Knowledge Base, Event Prep
- 12 Testimonials — community feed + admin moderation
- 13 Public site — chapter landing, event pages, testimonials feed

The login page

Every member, speaker, co-host, and organizer starts here. The login page lives at </login> and offers three ways to sign in, each on its own tab. The same page handles brand-new sign-ups and returning members — there is no separate "register" URL.

The **Google** tab is the fastest path: one click, choose your Google account, and you are in. The **Sign in** tab is for members who already received a password by email — type your email and password, then click the black "Sign in" button. The **Sign up** tab is for first-time members: enter your name and email, click "Send me a password", and we will email you a one-time password you can use to sign in for the first time.

The image shows three mockups of the login page tabs, each with the header "AI · SALON" and "Tel Aviv-Yafo".

- Google tab:** Features a "Continue with Google" button and a note: "Use the Sign up tab to receive a password by email instead."
- Sign in tab:** Features a "Sign in" button, an "Email" field with "you@example.com", a "Password" field with masked characters, and a "Sign in →" button.
- Sign up tab:** Features a "Sign up" button, a "Name" field with "Your full name", an "Email" field with "you@example.com", and a "Send me a password" button.

How members use this page

- **Returning members** → use Sign in with the password we emailed them.
- **New members** → use Sign up, then check their inbox for a one-time password.
- **Google users** → one-click sign-in with their existing Google account.
- **Forgot password?** → use Sign up tab; we email a fresh password instantly.
- **Role detection** happens automatically after sign-in — admins land on </admin>, members land on </events>.

The admin panel — 15 tabs at a glance

Once signed in as an organizer or admin, the admin panel opens with a horizontal tab strip across the top. Each tab is one workspace. The order is intentional: **left-to-right follows the lifecycle of an event** — members first, then speakers, then the event itself, then door check-in, then dashboards and reports, then the email system, and finally the mockups studio for promotional visuals.

Members

Community roster. Tags, roles, scope, archive, link to speakers.

Speakers

Speaker profiles per event. Photos, topics, bios, ordering.

Registrants

Who registered for which event. Status, RSVP, check-in state.

Events

All events. Edit, duplicate, see speaker & image counts.

New event

Wizard to create an event with chapters, dates, venues.

Chapters

Manage chapters worldwide. Brand images, slug, settings.

Door Check-in

Live QR-code scanner for the door. Real-time RSVP lookup.

Dashboard

Member-level analytics. Tags, growth, attendance trends.

Event dashboard

Per-event KPIs: registrations, check-ins, no-shows.

Reports

Exportable reports for sponsors and stakeholders.

Email

Campaigns, flows, audiences, templates, orchestrator.

Images

Brand images, WhatsApp & LinkedIn links, analytics settings.

Knowledge Base

Reusable articles and onboarding content for the chapter.

Mockups

The visual studio — 4 templates + AI prompt generator.

Event Prep

The speaker / co-host pre-event checklist workspace.

Role-based visibility: Super Admins and Admins see all 15 tabs. Chapter Organizers and Co-Hosts see a focused subset (Speakers, Registrants, Door Check-in, Event dashboard, Mockups, Event Prep) — exactly what they need to run their own chapter night.

CHAPTER 05

Members • Speakers • Registrants

These three tabs cover the **people** side of the platform: who is in the community, who is speaking at each event, and who has registered to attend. Together they hold every person who has ever interacted with your chapter.

Members tab

The full community roster. Each member has tags (speaker, builder, investor, founder), a role (Member, Co-Host, Admin, Super Admin), a country and chapter, and a link to any speaker profile they own.

- Search, filter by tag, country, chapter
- Assign & reassign roles
- Archive inactive members (Super Admin only)
- Link a member to a speaker profile
- View secondary emails & activity

Speakers tab

Every speaker attached to every event. Each speaker entry carries a name, title, company, topic, bio, photo, and an order number that controls the running sheet on the night.

- Add speaker to an event
- Reorder speakers (drag-and-drop)
- Upload or replace speaker photo
- Mark role: Speaker / Moderator / Panelist
- Link speaker to a community member account

Registrants tab

The RSVP list for every event. For each registrant you see their name, email, registration timestamp, RSVP status (Going / Maybe / Not Going), check-in state, and which event they signed up for. This is the list you watch live on the night of the salon.

- Filter by event, by status, by check-in state
- Export to CSV for sponsor reports
- Manually mark someone as checked-in
- Send a reminder email to anyone still pending
- Bulk-update statuses for last-minute changes

CHAPTER 06

Events tab — and the community event mockup

The Events tab is the heart of the platform. Every salon evening is a single Event record that holds the date, time, venue, chapter, speakers, agenda, hero image, registration form, and the visual mockups you will publish on social media. Click any event in the list to open its full editor.

Below is the **community event mockup** — the promotional visual used to announce a salon on social media, in newsletters, and on the chapter landing page. This mockup is generated automatically from the event's data: name, date, venue, topic, speakers, and brand imagery. Organizers do not need to design it manually; the platform builds it from the event record.

ai salon

Community Event

The community event mockup — auto-generated from the event record. Used on social media, the chapter landing page, and email campaigns.

What you can do from an event record

- Edit title, date, time, venue, capacity, description
- Attach speakers and reorder the running sheet
- Upload or replace the hero image
- Open the four mockup studios (Speaker Intro, Meet the Speaker, Agenda, Event Profile)
- Watch live registrations and check-ins on the event dashboard
- Duplicate an event to use as a template for the next month

Chapters • Door Check-in • Dashboards • Reports

These four tabs are the operational backbone: **Chapters** defines your chapter's identity and brand, **Door Check-in** runs the front desk on the night, **Dashboards** turn data into insight, and **Reports** lets you export that insight for sponsors and stakeholders.

Chapters tab

Each chapter has a name, slug (the URL piece — e.g. /c/tel-aviv), city, country, hero image, login hero, login banner, favicon, and brand color overrides. This is where you seed a new city into the platform.

Door Check-in tab

A live QR-code scanner that runs on any phone or laptop at the door. Members show their QR ticket; the scanner looks them up by RSVP, marks them checked-in, and updates the event dashboard in real time.

Dashboard tab

Member-level analytics. Track community growth, tag distribution, attendance frequency, and the conversion funnel from sign-up → first event → repeat attendee. Charts are toggleable so you can curate the view.

Reports tab

Exportable CSV / PDF reports for sponsors and stakeholders: per-event attendance, member growth, speaker roster, email campaign performance. One click, ready to send.

The Mockups studio — four canonical templates

The Mockups tab is a small but powerful design studio. It contains the four canonical event visuals that every chapter should produce for every salon: **Speaker Intro**, **Meet the Speaker**, **Agenda**, and **Event Profile**. Each template is fully editable — every text, image, color, and position can be tweaked — and each one auto-populates from the event's data so you can produce a polished visual in minutes, not hours.

Below each template in the studio there is also a **copyable AI prompt** you can paste into Grok Imagine, Flux, or Midjourney along with your event's JSON to generate an entirely new on-brand visual. This is how the platform keeps a consistent premium look across every chapter worldwide.

AI and Human Flourishing: What does it mean to be human in the age of AI?

The question every room is already asking This is the question being asked in every AI Salon room, in every city, right now. It's urgent. It's human. And it's the most important conversation AI Salon has ever organized. The conversation changes outcomes. This is not a soft topic. It is a strategic one.

19:15 Dan Ariely **PANELIST**
Author and professor **Duke University**
Israeli-American author and professor of business administration at Duke University. The Wall Street Journal columnist and serial entrepreneur. His profound understanding on human behavior provides a refreshing and unique perspective on the Human/AI challenges, and the future of humanity.

18:00 Adi Fine
CHRO **Elementor**
AI doesn't transform organizations. People, culture, and rebuilt workflows do. A People & Organization executive who treats AI Transformation as an organizational design problem - builds the framework and method, and brings people together to make it happen.

20:00 Yehoshua (Shuki) Cohen **PANELIST**
VP Applied AI **AI2I**
Nothing great was ever achieved without enthusiasm.

20:00 Dennis Nerush **PANELIST**
Director of AI Engineering **Elementor**
I believe that people come first. Everything else will follow.

18:45 Nir Lavion
CTO **H4 AI**
My mission is to guide global organizations in leveraging AI to drive positive, systemic change. Through transformational applications in medical research, security, and commerce, using Human-in-the-loop approach we are crafting a better future and creating real-world value for humanity.

20:00 Eyal Rond **PANELIST**
General Manager **RealSense**
I'm passionate about bringing groundbreaking ideas to market and building strategies that turn technology into business success. AI is transforming biometrics and access control faster than ever, and redefining how the world thinks about identity and security.

20:00 Noam Inbar **PANELIST**
General Partner **Viola FinTech**
I've navigated the growth lifecycle from both sides of the table.

20:00 Ido Vapner **PANELIST**
CTO & Global AI Leader **Kyndryl**
Lead enterprise AI, Agentic AI, and cloud transformation initiatives across multiple countries.

Agenda mockup — the full running sheet for the evening. Each session shows time, title, speaker, photo, and type (talk, break, networking). Color-coded for at-a-glance readability.

CHAPTER 09

Meet the Speaker — two designs

The **Meet the Speaker** mockup is the only template in the studio that ships in **two distinct designs**. Both share the same purpose — introduce one speaker in depth with their photo, name, title, company, topic,

and bio — but they take different visual approaches. Try both, pick the one that fits your speaker's personality, and reuse it for consistency across the season.

DESIGN 1

Design 1 — bold left-content / right-visual balance with geometric gradient overlays and the speaker portrait dominant on the right.

DESIGN 2

Design 2 — alternate composition. Same data, different layout. Use this when the speaker's portrait benefits from a different framing.

Both designs are production-ready. Pick one and stick with it for the season, or alternate per speaker. Either way, the platform auto-populates name, title, company, topic, bio, and photo from the speaker's record.

CHAPTER 10

The Email system

The Email tab is a complete email marketing and automation platform built into the admin panel. It has three top-level modes — **Campaigns** for one-off blasts, **Orchestrator** for staging and sequencing, and **Flows** for automated multi-step journeys — plus four building blocks: audiences, templates, stage templates, and flow steps. Every email sent through the platform is scoped to your chapter, so a Tel Aviv organizer never accidentally mails the Berlin chapter.

C Campaigns

One-off email blasts. Pick a template, pick an audience, preview, send. Tracks opens, clicks, bounces, and unsubscribes per campaign.

F Flows

Automated multi-step journeys. Trigger on event registration, check-in, no-show, or testimonial posted. Each step waits, sends, branches.

A Audiences

Reusable recipient lists. Build from tags, events, attendance, or paste a list of emails. Test audiences lets you mail yourself first.

T Templates

HTML email templates with subject, body, signature. Global templates (no chapter) are shared by every chapter; chapter templates are private.

O Orchestrator

The staging area. Compose, preview against real members, and schedule a send for the perfect moment — all from one panel.

S Stage templates

Pre-built templates for each lifecycle stage: invitation, reminder, day-of, post-event thank-you, testimonial request. Mark one as default per stage.

A typical event email journey

When you publish an event, the platform can automatically run this sequence for you — no manual sending required:

- **Invitation** → sent to your chapter audience the moment the event goes live.
- **Reminder** → sent 48 hours before the event to anyone who has not registered.
- **Day-of** → sent the morning of the event with the venue, agenda, and a QR check-in ticket.
- **Thank-you** → sent the morning after with the photos and a link to post a testimonial.
- **Testimonial request** → sent 3 days later to anyone who has not yet posted.

CHAPTER 11

Images • Knowledge Base • Event Prep

The last three admin tabs are utility workspaces. **Images** is the brand-asset library — the hero image, login banner, favicon, and social links for each chapter. **Knowledge Base** is a small CMS where you write reusable onboarding articles for your chapter. **Event Prep** is the speaker and co-host pre-event checklist workspace, the only tab speakers can access themselves.

Images tab

Per-chapter brand assets: favicon, login hero, login banner, event hero, OG image. Also stores your chapter's WhatsApp group link, LinkedIn page URL, and analytics settings (Plausible / GA ID).

Knowledge Base tab

A lightweight CMS for reusable content: how to register, what to expect at a salon, how to post a testimonial. Articles appear on the public site and in email flows.

Event Prep tab — the speaker workspace

Event Prep is the only admin tab speakers can see. It is a focused checklist workspace where each speaker reviews and confirms their bio, photo, topic, AV requirements, and arrival time before the salon. Co-hosts use the same tab to track readiness across all speakers for one event.

- Speaker confirms bio, photo, topic, session title
- Speaker uploads slide deck or shares link
- Speaker notes AV requirements (HDMI, mic, clicker)
- Co-host sees a per-speaker readiness indicator
- Auto-reminder emails fire from this state

CHAPTER 12

Testimonials — community feed + moderation

Testimonials are the platform's member-generated review system. After every event, members can post a short quote, a 1–5 star rating, and an optional photo. Each testimonial is attached to a specific event, speaker, or agenda item, which gives future visitors a real sense of what a salon evening feels like. Testimonials appear on the public site at [/testimonials](#) and inside the admin panel under the Testimonials tab for moderation.

Delete

Testimonial features — full list

- **5-star rating** on every testimonial, with star icons rendered next to the author
- **Author identity** — avatar (or initials fallback), name, company, photo URL
- **Optional photo** — click to enlarge in a dialog lightbox
- **Quote body** — multi-line, preserves line breaks, wraps long URLs
- **Attachments** — each testimonial links to the event, speaker, and/or agenda item it references
- **Like button** — members can like; counter updates optimistically; toggles on click
- **Share button** — uses the browser's Web Share API on mobile, copies a link on desktop
- **Featured badge** — admins mark the best testimonials; featured ones get a pink ring
- **Hidden state** — admins hide without deleting; hidden testimonials stay in the database
- **Delete** — author can delete their own; admins can delete anyone's
- **Admin toolbar** — filter by Featured only / Hidden only, refresh, total count
- **Per-card admin actions** — Feature / Unfeature, Hide / Unhide, Delete — all one click

Public feed (members)

At /testimonials, members see only visible, non-hidden testimonials sorted by recent or featured. They can like, share, post their own, and filter by event or speaker.

Admin moderation

At /admin/testimonials, organizers see every testimonial including hidden ones. The admin toolbar lets you feature the best, hide the rest, and delete spam — all without leaving the page.

CHAPTER 13

The public site — what members see

Everything we have covered so far lives behind the login. The public site is what your members and future members see without signing in. It has three main surfaces: the **chapter landing page**, the **event pages**, and the **testimonials feed**. Together they form the front door of your chapter.

Chapter landing — /c/[chapterSlug]

Your chapter's home page. A hero image on the left, a one-tap registration form on the right, and the upcoming events list directly below. The slug in the URL (e.g. /c/tel-aviv) is set in the Chapters tab.

Event pages — /events/[slug]

One page per event. Shows the hero mockup, the agenda, the speaker list with photos and bios, the venue with a map, and the registration form. Shareable link for social media and email.

Testimonials feed — /testimonials

The public, member-generated review wall. Visible testimonials sorted by recent or featured. Each card shows stars, author, company, quote, optional photo, attachment chips, like and share buttons. Members can post their own testimonial and attach it to any event or speaker they have attended.

Tip for new chapters: the very first thing a visitor sees is your chapter landing page. Spend time on the hero image (set it in the Images tab) and keep the upcoming-events list fresh — empty event lists are the #1 reason new visitors bounce.

Quick start for a brand-new chapter

If you are launching a new chapter, follow this order — each step takes about 10 minutes and unlocks the next:

- **1 · Create the chapter** in the Chapters tab — set name, slug, city, country.
- **2 · Upload brand images** in the Images tab — hero, login banner, favicon.
- **3 · Set social links** — WhatsApp group, LinkedIn page, analytics ID.
- **4 · Create your first event** in the New event tab — date, venue, capacity, description.
- **5 · Add speakers** in the Speakers tab — name, photo, topic, bio, order.
- **6 · Generate the mockups** in the Mockups tab — Speaker Intro, Meet the Speaker, Agenda, Event Profile.
- **7 · Publish & announce** — share the event URL on social, send the invitation email flow.
- **8 · Open Door Check-in** on the night — your phone becomes the front desk.

What members can do (without an admin)

Members get their own set of capabilities on the public site, with no admin help required. Knowing this list helps you write better invitations and onboarding emails.

- Register for any published event in one tap from /c/[chapterSlug]
- Receive a QR check-in ticket by email automatically
- Browse the community testimonials feed at /testimonials
- Post their own testimonial with stars, photo, and quote
- Like and share any testimonial
- Edit their own profile, name, company, photo
- See their personal event history and attendance

WELCOME TO THE PLATFORM

Now go run a **great** salon.

You have seen every screen, every tab, every mockup. The platform is built so that organizers can focus on the people in the room — not the software behind it. Sign in, open the Events tab, and start with your first salon evening. Everything else flows from there.
