

Chapter Onboarding Guide

A visual tour of the AI Salon platform — what your members see, what they can do, and how every screen works.

Member Experience

Visual Mockups

Email Capabilities

Prepared for new chapter organizers · Non-technical overview

0

Welcome

What this guide is for

This document is a visual, non-technical walkthrough of the AI Salon platform. It is designed for organizers of future chapters — whether you are launching AI Salon Berlin, AI Salon Singapore, or AI Salon Austin — so you can see exactly what your members will experience, what screens they will encounter, and what each part of the platform does. Unlike the internal technical guide, this one focuses on the user-facing experience: the pages, the buttons, the emails, the mockups, and the features that make a chapter come alive.

Every screen captured here is shown with a brief explanation of what it does, who sees it, and how a member moves through it. Where the platform offers visual mockups for promoting an event, we show you both design variants side by side. Where emails are sent automatically, we show you the lifecycle and the look of each stage. By the end of this guide, you should have a complete mental model of the member journey — from the moment someone first lands on your chapter page to the moment they check in at your event door.

How to read this guide

- Screenshots are captured from the live Tel Aviv production site, so what you see is what your chapter will look like (with your own branding swapped in).
- Mockups are the design templates your chapter can generate for promoting events — we show every variant.
- Email examples are recreated from the actual templates your members will receive.
- Brief explanations accompany every visual — just enough to understand what each screen does, without going into admin settings or technical setup.

09	Speaker Mockups Two design variants for promoting speakers
10	AI & Human Flourishing The global conversation microsite
11	Feature Index Everything in one place

1

Chapter Landing Page

Every chapter has its own public URL: `aisalon.massapro.com/c/your-chapter`. This is the page you will share on WhatsApp, LinkedIn, and printed materials when inviting people to join. It is the front door to your community — and it works without requiring anyone to log in.

The page is split into two zones: a colorful hero that introduces the chapter identity (city, country, member count, and community links), and a main section that shows your upcoming events next to a simple sign-up form. Visitors can browse what is happening without an account, and they can register for the chapter in under 30 seconds with just their name and email.

The Tel Aviv chapter landing page — your chapter will look just like this, with its own city, branding, and events.

What is on this page

- Chapter hero — name, city, country flag, member count, and events hosted count.
- Community links — WhatsApp group and LinkedIn page, opened in a new tab.
- Upcoming events list — the next 5 events with thumbnail, date, venue, and RSVP count.
- Sign-up form — name and email is all that is required to join the chapter.
- Footer — link to all other chapters in the network.

Mobile view

The chapter landing page is fully responsive. On a phone, the hero stacks vertically, the sign-up form moves below the events list, and every tap target is large enough for one-handed use. This matters because most first-time visitors will arrive from a WhatsApp or LinkedIn link on their phone — the page must look great on a small screen.

Mobile view of the chapter landing page — optimized for visitors arriving from WhatsApp.

2

Sign-up & Onboarding

Joining AI Salon is intentionally frictionless. A new member enters only their name and email on the chapter landing page — the platform generates a one-time password, emails it to them, and asks them to sign in. On first sign-in, they are sent to a 10-question onboarding form that captures the rest of their profile: company, role, mobile, LinkedIn, interests, and what they want to apply for (fast pitch, lecture, or nothing). Only after onboarding do they reach the events list.

The login page — three tabs: Google sign-in, email+password, or sign up with name and email.

Three ways to sign in

- Google — one-tap OAuth, no password to remember.
- Email + password — for members who prefer a password.
- Sign up — name and email only; we email a one-time password to verify ownership.

The 10-question onboarding form

After first sign-in, every new member lands on the onboarding form. This is where the community learns who they are. The form is one page, takes about 90 seconds, and includes: full name, company, job title, mobile, LinkedIn URL, topics they are interested in

(multi-select), what they want to tell the community about, and whether they want to apply for a fast pitch or a presentation slot. Once submitted, they are redirected to the events list and become a full member of the chapter.

Mobile view of the login page — the same three tabs, optimized for thumb taps.

3

Public Event Page

Every event gets its own shareable URL: aisalon.massapro.com/e/your-event-slug. This page is the conversion machine of the platform — it is what you will share on LinkedIn, drop in WhatsApp groups, and embed in speaker mockups. It works for anonymous visitors (they will be asked to sign up when they click Register) and for signed-in members (one click and they are RSVP'd).

The page is laid out as a hero image and event title at the top, a sticky sidebar on the right with the Register call-to-action (which stays visible as the visitor scrolls), and a long left column with everything a member needs to decide: an about section, what they will take home, who the event is for, the speaker lineup, and the agenda timeline.

The event page layout — hero strip, tab navigation, and a sticky registration sidebar.

What a visitor sees

- Hero image and title — the visual identity of the event.
- Meta line — chapter badge, city, date, time, country, and a black 'X Going' pill.
- Venue block — address with one-click 'Open in Maps' and 'Open in Waze' deep links.
- About / Take-home / Who this is for — three short prose sections with colored accents.
- Speakers grid — 2-column cards with photo, role, company, topic, and bio.

- Agenda timeline — talk, panel, and break segments with speaker line per item.
- Sticky CTA card — Register button that morphs as the member's state changes.

The CTA card has 5 states

State	What the member sees
Anonymous visitor	"Register to event" → takes them to login
Signed-in, not registered	"Register to event" → one-click RSVP
Registered, check-in open	"You're registered" + "I'm here — Check in" button
Checked-in	Big green panel with their 8-char check-in code
Past event	"This event has ended" + "View recap & photos" link

4

Member Event Experience

Once a member signs in, the event page unlocks a richer experience: a tabbed interface that goes far beyond the public landing page. Where a visitor sees a marketing page, a member sees a community workspace — with photos, presentations, a live quiz game, an event-scoped chat room, and (for speakers and managers) prep tools.

Tabs are deep-linkable, so you can send a member directly to the quiz or the photos with a URL hash like #quiz or #photos. Three of the tabs are restricted: Event Prep is for speakers and managers, Manage Agenda is for admins, and Manage Event is for managers. The rest are open to every member.

The members-only event page — 10 tabs covering content, community, and management.

What each tab does

Tab	Who sees it	What it offers
Speakers & Agenda	All members	Full agenda timeline with speaker cards and session types
Overview	All members	Event description + RSVP/check-in widget
Photos	All members	Community-uploaded photo gallery with main-image picker
Slideshow	All members	Auto-crossfade slideshow of event photos

Presentations	All members	Speaker slide decks (PDF/PPT)
Quiz	All members	Live multiplayer quiz with real-time leaderboard
Chat	All members	Event-scoped group chat room
Event Prep	Speakers + managers	Prep checklist before the event
Manage Agenda	Admins	Edit agenda items and assign speakers
Manage Event	Managers	Edit event details, co-hosts, and speakers

Teal = speakers/managers only · Pink = admins/managers only

5

Community Directory

The community directory at /community is the membership roster of your chapter. Every member who has completed onboarding appears here as a card with their photo, name, title, company, LinkedIn link, and tags. Members can browse the directory, search by name, and contact anyone via a private 1-on-1 direct message — no email address or phone number exposed.

This is one of the most underrated features of the platform. It turns a list of event attendees into an actual network: a member who met someone at last week's event can find them in the directory the next day and continue the conversation. The directory is gated behind sign-in, so only verified members can see other members.

- Photo, name, title, company — the essentials, shown on every card.
- Tags — colored labels showing areas of expertise or interest.
- LinkedIn link — one click to view their full professional background.
- Contact button — opens a private 1-on-1 chat dialog, no email or phone exposed.
- Inbox badge — the header shows an unread count for new direct messages.
- Sort — members with photos first, then alphabetical by name.

"The community directory is what makes AI Salon more than an event platform — it is a living network. Members meet at an event, find each other in the directory the next day, and continue the conversation."

6

Profile & Referrals

Every member has a profile page at /profile where they can edit their photo, bio, company, LinkedIn, portfolio URL, and tags. The profile page also hosts the referral program — a built-in growth loop where members get a personal share link, can track how many people they have brought into the community, and can see how many of those referrals went on to register for events.

When a member shares their referral link on WhatsApp or LinkedIn, anyone who clicks it is silently attributed to them via a 30-day cookie. If that visitor signs up and registers for an event, the original referrer gets credit. The referrer's profile shows four stats: visits, new visitors, signups driven, and RSVPs driven.

- Photo upload — drag-and-drop, automatically resized and stored in Vercel Blob.
- Bio — free-text introduction shown on the community directory card.
- Company + URL — link to the member's company website.
- LinkedIn + Portfolio — external links for deeper professional context.
- Tags — colored labels for areas of expertise.
- Referral share card — native share button (works on mobile) + clipboard fallback.
- Referral stats — visits, new visitors, signups, and RSVPs driven, all in real time.
- Change password — self-service password reset from the profile.

"The referral program is how AI Salon grows without paid ads. Members who love the community share their link, their friends sign up, and the chapter grows organically. Top referrers can be recognized publicly at events."

7

Testimonials

The testimonials feed at /testimonials is where members post short reviews about their AI Salon experience. It is a community-driven wall of social proof — every testimonial has a star rating, an optional photo, an experience date, and one of four scope chips that says what the testimonial is about.

Members can like and share testimonials. The four scopes let the feed stay organized: a member can write about the community as a whole, a specific event, a specific speaker, or a specific session. This makes it easy for organizers to find testimonials about a recent event and reshare them on LinkedIn.

- Four scopes — community, event, speaker, or session.
- Star rating — 1 to 5 stars, shown next to each testimonial.
- Photo attachment — optional, for event photos or speaker headshots.
- Experience date — when the experience being reviewed took place.
- Like button — community curation of the best testimonials.
- Share button — native share with clipboard fallback.
- Sort by recent — newest testimonials appear first by default.

8

Email Lifecycle

AI Salon runs a 5-stage automated email flow that fires the moment a member registers for an event and continues through event day and into the post-event recap. Each stage has its own template, its own trigger window, and its own tone — from a warm welcome on registration, to a final prep email with the check-in code on the day of the event, to a thank-you recap with links to photos and recordings after it ends.

Every email is brand-styled with the AI Salon purple-pink-teal palette, includes the chapter logo, and is tracked for opens and clicks so organizers can see what is resonating. The first email also includes a .ics calendar attachment so members can add the event to Apple Calendar or Outlook in one click.

The 5-stage email lifecycle — from RSVP to post-event recap.

Stage 1 — the RSVP confirmation email. Includes event details and a .ics calendar attachment.

The 5 stages in detail

#	Stage name	When it sends	What it contains
1	Awareness	Immediately on RSVP	Welcome + event details + .ics calendar attachment
2	Reminder	48 hours before event	Reminder + agenda preview + speaker list
3	Final Prep	4 hours before event	Final details + check-in code (or CTA to generate one)
4	Day-Of	At event start time	Starting now + check-in code + agenda + venue map link
5	Recap	After event ends	Thank you + photos link + recordings link + next event preview

Smart features built into the flow

- Alt-subject re-send — if a member does not open the primary email within X hours, the platform re-sends the same content with an alternate subject line.
- No-code variant — for the Final Prep and Day-Of emails, if the member has not generated their check-in code yet, the email swaps the code line for a 'Generate my check-in code' CTA.
- Open and click tracking — every email has an invisible tracking pixel and every link is wrapped so organizers can see what was opened and clicked.
- Brand logo auto-injection — every email gets the chapter logo injected top-right, no manual setup needed.
- Unsubscribe link — every email includes a one-click unsubscribe, as required by GDPR and CAN-SPAM.

9

Speaker Mockups

To help chapters promote their events on social media, the platform ships with two speaker-focused mockup templates that organizers can generate, customize, and download as print-quality PNGs. Both templates are brand-styled, JSON-driven, and produce a 1200×800 canvas that looks great on LinkedIn, Twitter, and printed flyers.

The first template — Speaker Intro — is designed for multi-speaker events: it shows the full roster in a grid alongside a hero image with location pins. The second template — Meet the Speaker — is for spotlighting a single featured speaker ahead of a keynote or fireside chat. Meet the Speaker has two visual styles, and we show both below.

Variant A — Speaker Intro (multi-speaker roster)

Use this template when your event has 3 or more speakers and you want to show the full lineup in one image. The layout has a header banner with the event name and topic, a hero image on the right (with location pins for the venue neighborhood), and a grid of speaker cards on the left. Each card shows a headshot, name, title, company, topic pill, short bio, and session time. The footer has space for collaborator and sponsor logos plus a QR code.

Variant A — Speaker Intro mockup, showing a 4-speaker roster for an AI Salon Tel Aviv event.

Variant B — Meet the Speaker (Style 1: Geometric gradient)

Use this template when you want to spotlight a single keynote speaker. The layout is split 50/50: the left column has a pink 'Meet the speaker' pill, the speaker's name in large bold type, their title and company, the topic with a short description, a bio block, and an expertise block. The right column has the speaker's portrait over a geometric gradient background with triangular overlays. Style 1 uses an SVG-generated geometric gradient — clean, modern, and on-brand.

Variant B Style 1 — Meet the Speaker with geometric gradient overlay.

Variant B — Meet the Speaker (Style 2: Local Street pins)

Style 2 keeps the same left-column speaker info layout but swaps the right-column background for a low-poly network graph overlay. The four corners of the right column are marked with 'Local Street' pins — by default these are filled with notable Israeli tech companies (Mobileye, Wiz, Waze, Elementor), but they are fully editable per event. This style works well when you want to convey a sense of place and local tech ecosystem.

Variant B Style 2 — Meet the Speaker with low-poly network graph and Local Street pins.

When to use which variant

- Multi-speaker event (3+ speakers) → use Variant A (Speaker Intro).
- Single keynote or fireside chat → use Variant B (Meet the Speaker).
- Tech-focused audience → Style 2 with Local Street pins.
- General business audience → Style 1 with geometric gradient.
- Both variants are downloadable as print-quality 2× PNGs, ready for LinkedIn, Twitter, or print.

10

AI & Human Flourishing

Beyond the chapter platform, AI Salon hosts a global conversation microsite at aisalon.massapro.com/resources/ai-human-flourishing. This is a public, shareable microsite that explores how AI can support — rather than diminish — human flourishing. It is the same microsite across all chapters, and any chapter can link to it from their landing page or event emails.

The microsite has 8 anchor sections: Home, Welcome, Global Map (showing 14 participating cities), How to Host, Four Postures, Six Areas, Practical Tools, and Become a Convener. It includes interactive elements like a vow generator (saved to local storage) and a tool tracker that lets visitors mark which practical tools they have tried. Each tool — like the Identity Matrix, the Prompt-Scaffolding Canvas, or the Curiosity Loop — has its own detail page with instructions and examples.

The AI & Human Flourishing microsite — global conversation, open to all chapters.

11

Feature Index

Every member-facing feature of the platform, in one place. Use this as a reference when planning your chapter launch — it tells you what your members get out of the box, without any custom development.

Category	Feature	What it does
Account	Google OAuth sign-in	One-tap sign-in with Google account
Account	Email + password sign-in	Traditional credentials for members who prefer passwords
Account	Email sign-up with OTP	Name + email only; we email a one-time password
Account	Chapter-scoped login branding	Each chapter can have its own login hero image
Account	10-question onboarding	Forced first-time intake form
Account	Profile editor	Photo, bio, company, LinkedIn, portfolio, tags
Account	Change password	Self-service password reset from profile
Discovery	Public events list	Browse all upcoming events with chapter/city filters
Discovery	Public event page	Shareable URL for each event with full details
Discovery	Public chapter page	Per-chapter landing with hero + events + signup
Discovery	'X Going' pill	Live count of registered members
Discovery	Open in Maps / Waze	One-click deep links per event venue
RSVP	One-click RSVP	Signed-in members register with one click
RSVP	Idempotent RSVP	Clicking register multiple times is safe
RSVP	Cancel RSVP	Members can cancel their registration
RSVP	RSVP confirmation email	Email with .ics calendar attachment
RSVP	'Your registered events' section	Personal list on the events page
Check-in	Self check-in code	8-char unique code, generated 2h before event
Check-in	Mobile-first code page	Dedicated /e/<slug>/my-code page for phones
Check-in	Copy check-in code	One-tap copy button
Check-in	Door check-in (admin)	Two-step lookup + confirm at the venue door
Calendar	Save to Calendar dropdown	iCal / Google / Outlook / Yahoo
Calendar	.ics attachment	Calendar file attached to RSVP email
Community	Member directory	Grid of all onboarded members
Community	1-on-1 direct messages	Private DMs between any two members
Community	Inbox unread badge	Header shows unread DM count
Community	Member tags	Colored labels for expertise

Category	Feature	What it does
Event tabs	Speakers & Agenda tab	Timeline with speaker cards
Event tabs	Photos tab	Community-uploaded gallery
Event tabs	Slideshow tab	Auto-crossfade photo slideshow
Event tabs	Presentations tab	Speaker slide decks (PDF/PPT)
Event tabs	Quiz tab	Live multiplayer quiz with leaderboard
Event tabs	Chat tab	Event-scoped group chat
Event tabs	Event Prep tab	Speakers + managers only
Event tabs	Manage Agenda tab	Admins only
Event tabs	Manage Event tab	Managers only
Event tabs	Tab deep-linking	URL hash like #quiz or #photos
Testimonials	4 scope chips	Community / event / speaker / session
Testimonials	Star rating	1 to 5 stars per testimonial
Testimonials	Photo attachment	Optional image per testimonial
Testimonials	Like + share buttons	Community curation and sharing
Referrals	Referral share card	Personal link with stats
Referrals	Native share	navigator.share with clipboard fallback
Referrals	UTM cookie (30-day)	Silent attribution of signups
Referrals	Referral stats	Visits, new visitors, signups, RSVPs
Email	5-stage orchestrator	Awareness → Reminder → Final Prep → Day-Of → Recap
Email	Alt-subject re-send	Re-sends with alt subject if unopened
Email	Open + click tracking	Analytics on every email
Email	No-code variant	CTA swap if code not generated
Email	Brand logo auto-injection	Chapter logo top-right
Email	One-click unsubscribe	GDPR + CAN-SPAM compliant
Mockups	Speaker Intro template	Multi-speaker roster (Variant A)
Mockups	Meet the Speaker Style 1	Geometric gradient (Variant B Style 1)
Mockups	Meet the Speaker Style 2	Low-poly network + Local Street pins
Mockups	Print-quality PNG export	2× DPR, ready for LinkedIn or print
Microsite	AI & Human Flourishing	8-section global conversation microsite
Microsite	Global map	14 participating cities
Microsite	Vow generator	LocalStorage-backed personal vow
Microsite	Tool tracker	Mark which tools you have tried
Microsite	Tool detail pages	Identity Matrix, Prompt-Scaffolding Canvas, etc.
Other	Cookie consent banner	6-month localStorage

Category	Feature	What it does
Other	Open Graph metadata	Rich previews on social media
Other	Per-event OG image	Uses event main image
Other	Privacy + Terms pages	Legal pages included
Other	Mobile-responsive	Every page optimized for phones
Other	Toast notifications	Feedback on every action

Total: 66 features across 13 categories.
