

A READING COMPANION FROM THE AI SALON TLV COMMUNITY

AI & Human Flourishing

Seven quotes and four models from AI and the Art of Being Human — curated to encourage and inspire AI builders to build conscious AI systems.

AI and the Art of Being Human

Jeffrey Abbott & Andrew Maynard

A practical guide to thriving with AI while rediscovering yourself in the process.

01 THE EVENT

What does it mean to be human *in the age* *of AI?*

Monday, July 13, 2026 · 18:00 — 21:30 IDT
Elementor Offices · 15th floor, Sapir Tower
Ramat Gan, Israel

18:00	NETWORKING Door opening
18:30	WELCOME Welcoming community Ezequiel Sznaider · Chapter Lead, AI Salon TLV
18:45	TALK Real world impact of AI Nir Lavion · CTO, HI4.AI
19:00	TALK How We Brought AI to Elementor Together Adi Fine · CHRO, Elementor
19:15	TALK What does it mean to be human in the age of AI? Dan Ariely · Author and professor, Duke University
19:45	BREAK Break
20:00	PANEL Being human in the era of AI Moderator: Ezequiel Sznaider · Panelists: Dan Ariely, Shuki Cohen, Noam Inbar, Dennis Nerush, Ido Vapner, Eyal Rond

02 THE BOOK

A practical guide to thriving with AI.

AI and the Art of Being Human

*A practical guide to thriving with AI while
rediscovering yourself in the process.*

JEFFREY ABBOTT & ANDREW MAYNARD

This booklet distills the book into six of its sharpest sentences and four of its working models — the ones the AI Salon TLV community will be referencing throughout the evening.

Each model is a small practice you can run in fifteen minutes: a spectrum to locate your work, a matrix to map your identity, a loop to convert defensiveness into curiosity, and a canvas to shape how you talk with AI.

Take notes in the margins. Argue with the quotes. The point of the evening is not to agree — it is to leave with better questions.

Scan the QR code on the back cover for the full event page, RSVP, and check-in.

03 WHY THIS SECTION

Build *consciously.*

This section is here to encourage and inspire AI builders to build conscious AI systems.

The quotes and models that follow are not abstractions. They are working tools for people who ship AI products and want to ship better ones — sharper questions, clearer boundaries, a more honest map of what AI can do and what only humans can do.

Read them slowly. Argue with them. Notice which one lands and which one stings. The point is not to agree with the authors — it is to leave the page with sharper questions than you brought to it.

ENGAGE

Explore the interactive platform

Visit the **Human Flourishing** interactive site to work with the four models yourself: locate your work on the spectrum, map your identity, run a curiosity loop, scaffold a real prompt. Scan the QR code on the back cover.

GO DEEPER

Get a copy of the book

If the seven quotes leave you wanting more, the full framework lives in *AI and the Art of Being Human* by Jeffrey Abbott & Andrew Maynard — available on Amazon. The book is the source for every quote and model in this companion.

P. 25 CHAPTER 1 · THE CURIOSITY LOOP

*But walls don't stop water.
They just influence where it
flows —
and where it **floods** when
they break.*

FROM AI AND THE ART OF BEING HUMAN · ABBOTT & MAYNARD

01 TOOL · MODEL

Human Qualities Spectrum

A way to understand which human qualities AI can replicate — and which remain uniquely ours. Not a hierarchy: we need all three.

REPLICABLE

Skills AI can master — calculation, pattern, style.

RELATIONAL

Presence, context, the room — AI joins but misses the current.

TRANSCENDENT

Meaning, moral imagination — what arises from being human.

INVEST YOURSELF →

Not a hierarchy — we need all three. But stop pretending the left end makes you irreplaceable.

QUOTE 02 · CHAPTER 1

P. 35

The Curiosity Loop

Notice • **Reflect** • **Question** • **Experiment**

02 TOOL · MODEL

Identity Matrix

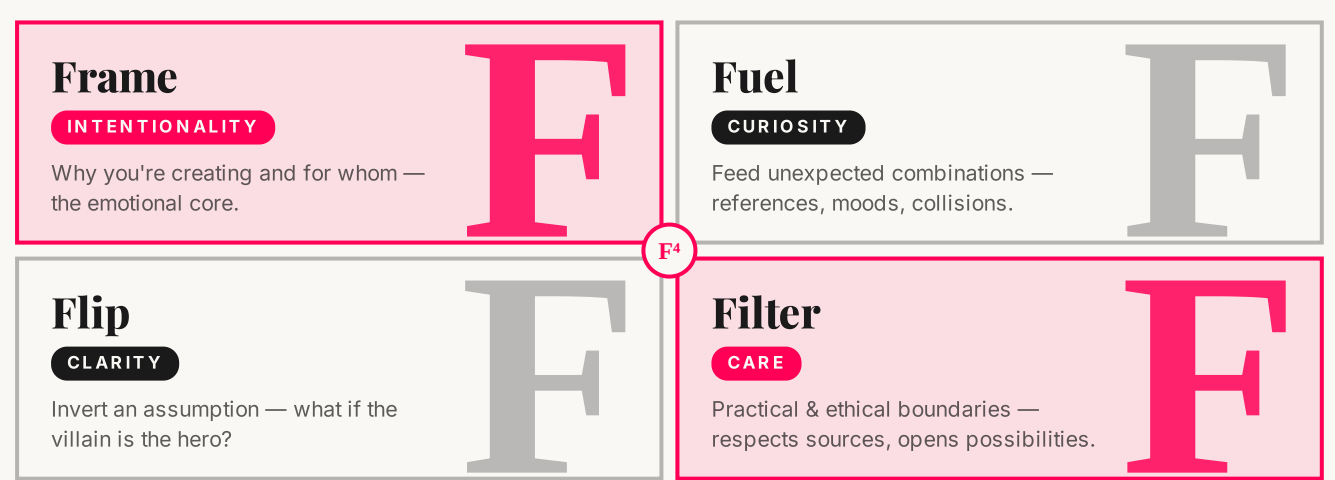

A map to help distinguish what AI can automate from what makes you irreducibly you.

04 TOOL · MODEL

Prompt-Scaffolding Canvas

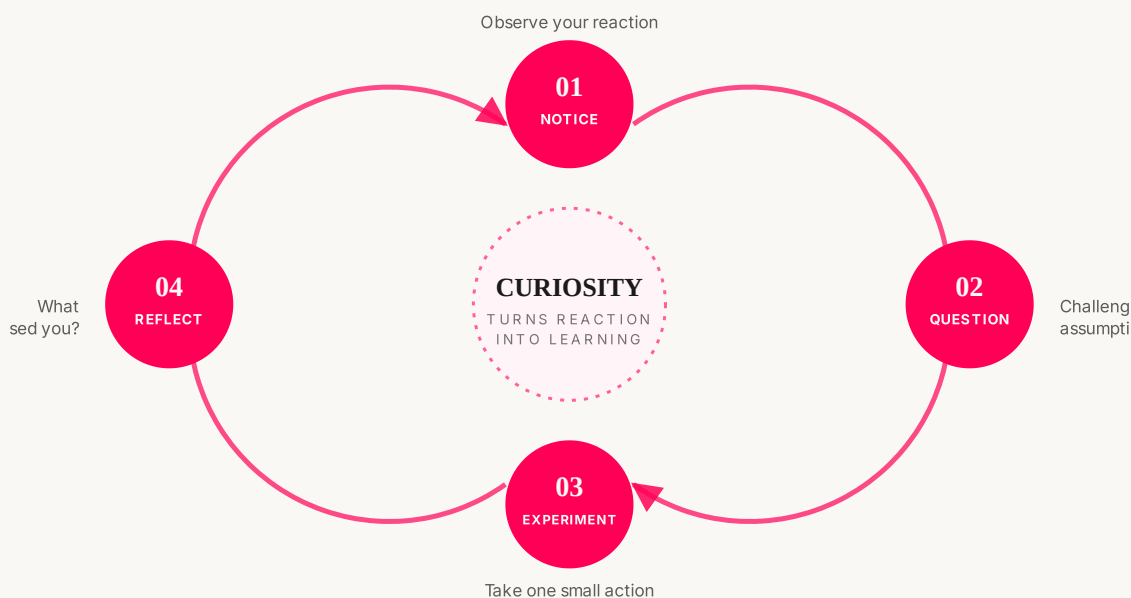

Four quadrants to shape the full creative partnership with AI — not just the opening prompt.

03 TOOL · MODEL

The Curiosity Loop

A repeatable practice that transforms defensive reactions into learning opportunities when facing technological change.

A practice, not a one-time exercise — each pass turns defensiveness into a question.

QUOTE 03 · P. 35

*Curiosity isn't only about **learning** — it's about **thriving through change**.*

CHAPTER 1 · THE CURIOSITY LOOP

QUOTE 04 · P. 39

*In a world obsessed with having the correct answers, the real competitive advantage might come from **asking better questions**.*

CHAPTER 1 · THE CURIOSITY LOOP

· THREE CLOSING QUOTES

From chapter 3 onward.

05 QUOTE · CHAPTER 3

P. 80

*The question isn't "What can't AI do?"
It's "**What will I choose to cultivate,**
regardless of what AI can do?"*

06 QUOTE · CHAPTER 3

P. 84

*"If your company disappeared tomorrow, **who would miss it** and why?"*

07 QUOTE · CHAPTER 3

P. 84

*The leaders we need now don't compete with machines — they use them to **amplify what humans alone choose to care about.***
